

Temporary Filling Material

DIRECTIONS FOR USE

FEATURES:

A ready to use temporary filling material with a synthetic resin base. Adequate strength yet easily removed. Good adhesion to dentine and excellent marginal adaptation. Good sealing characteristic, easy to use consistency. It is not a permanent filling material and recommended use is up to a maximum of 4 weeks only.

INDICATIONS:

- Temporary filling of cavities
- Temporary sealing of inlay preparations
- Temporary sealing of endodontic treatments
- Temporary fixing of post crowns

APPLICATION:

Using a suitable filling instrument, place direct into cavity and adapt as necessary. It is not essential to dry the cavity prior to placement. Temporary filling material hardens by absorption of moisture to give an impermeable seal. It is recommended that masticatory pressure is not applied for approximately 1 hour. For provisional fixing of post crowns spread a layer on inside of crown and seat in normal way.

STORAGE:

Store in cool dry place (5 – 25°C). It is important that caps are tightly replaced after each use.

BATCH CODE:

The batch code gives an open date of manufacture in month, year, day format with a numerical suffix to uniquely identify the batch of material. Please quote this batch number in all correspondence.

The expiry date is shown in year, month format. Do not use the product after this date.

SPECIALLY FORMULATED FOR USE IN DENTISTRY
