

# proKlene +

## proKlene Prophylaxis Paste Regular

**Oil-free paste with a selected blend of abrasives to ensure optimum removal of plaque and tartar without excessive abrasion to enamel.**

The oil free prophylaxis paste is based upon AHL's regular paste, but contains no oil so is suitable for cleaning of tooth cavities prior to placing restorations. (Pastes containing oil interfere with the adhesion of dental restoratives). The thixotropic properties of the paste are carefully controlled to ensure easy application without undesirable spattering at the rotation speeds required for prophylaxis. The oil free prophylaxis paste contains only natural flavourings, is fluoride free and available in fine, medium and course grades.

### Product Indications

For removal of plaque, tartar and scale from the tooth surface  
Cleaning or cavities prior to the placement of restorations.

### Features

Contains no oil  
Thixotropic  
Natural Flavourings

### Advantages

No restoration adhesion problems  
Reduced spattering  
Patient acceptance
