## Bonding Adhesive (Single Part) Light Cure

### Product Description

A single component prime and bond material, suitable for bonding composites and compomers, to enamel dentine and metal. The material is in the form of a viscous, non-thixotropic light curable liquid that has the ability to moisten and penetrate dentine.

### Features and Benefits

- |   |   |                               |
|---|---|-------------------------------|
| • Single application                              | - | No need for a separate primer |
| • Solvent free                                    | - | Odourless                     |
| • Apply to wet or dry, etched or unetched dentine | - | Minimal preparation required  |
| • Viscous liquid                                  | - | Easily controllable           |
| • High bond strength                              | - | Lasting restorations          |

### Product Indications

- For bonding composites and compomers to enamel, dentine and metal
- Direct restorations
- Direct and indirect inlays, onlays and veneers

### Shelflife

4 years from the date of manufacture when supplied in AHL's standard packaging.
