

GOOD AESTHETICS & DURABLE RESTORATIONS

- ✓ Good early translucency
- ✓ High strength
- ✓ Packable consistency
- ✓ Good wear and erosion resistance
- ✓ Vita® shades
- ✓ Easy mixing

Powder/Liquid 15gm/7ml plus mixing pad and scoop

AHfil Anterior Restorative Material

AHfil glass ionomer filling materials are manufactured using translucent alumina-silicate glass that offers good aesthetics without compromising on strength and wear resistance.

AHfil anterior restorative material delivers good translucency and is biocompatible with minimal pulp sensitivity. It has a CTE close to that of natural dentition and good bond strength. Optimum working and setting time. Easy mixing and handling.

Indications

- Class V cavities
- Class III cavities
- Class I and II cavities in deciduous teeth
- Pits and fissures

Features

- Good early translucency
- High strength
- Packable consistency
- Good wear and erosion resistance
- 5 VITA® shades
- Easy mixing

Advantages

- Good aesthetics
- Long lasting restorations
- Ease of handling
- Durable restorations
- Good tooth matching

Available in	Code
A1	AH0001
A2	AH0002
A3	AH0003
A3.5	AH0004
B2	AH0005

Property	ISO9917-1:2007 Classes B & C	Typical Properties
Working Time	–	1 min 57 sec
Net Setting Time	1 min 30 secs – 6 mins	2 mins 32 secs
Compressive Strength	100MPa Minimum	200+ MPa
