### reliaFIL Flow Light Curing Flowable Composite Material

reliaFIL Flow is AHL's universal light cured composite filling material. Using advanced particle technology we have developed a composite material which has good wear resistance and aesthetics.

An advanced light curing flowable composite material offering controlled light diffusion for good aesthetics and visual appearance. Good handling based on flow properties combined with high strength and high elasticity for durable restorations. Radiopaque.

Good handling, good strength and elasticity

Flowable - ideal for small restorations

Excellent radiopacity

Optimal light diffusion for aesthetics and visual appearance

Light cure - command setting

#### Indications

Anterior class III & V involving cervical caries, wedge shaped defects

Small posterior class I & II without occlusal stress bearing

Deciduous restorations

Preventive restoration (pit & fissure sealant).

Base/liner under restoration

Undercut blockout

Additional or marginal filling and recontouring after composite restoration

Colour adjustment on the surface of composite resin restoration and discoloured teeth

#### Features

Radiopaque

Light cure

Optimal light diffusion

High elasticity

Contains fluorescent agent

#### Advantages

Shows on X-rays

Command setting

High aesthetics

Forgiving under load

Matches enamel fluorescence

Available in	Code	Available in	Code
A1	AH0900	A4	AH0904
A2	AH0901	A3O	AH0905
A3	AH0902	A3T	AH0906
A3.5	AH0903		

Property	ISO4049:2019	Typical Properties
Flexural Strength	80 MPa	100 MPa
Depth of Cure (mm)	1mm min.	5.5mm
Radiopacity	1.0 mm:Al	2.9mm:Al
Compressive Strength	-	350MPa
