reliaFlow Bulk

reliaFlow Bulk is an advanced flowable composite predominately designed as a base under class I & II restorations.

A bulk filling composite with ideal shade opacity, low shrinkage and full polymerisation at 4mm depth of cure. The self-levelling characteristics produce good cavity adaptation. Suitable for use with both Halogen and LED curing lights.

Indications

Base in class I & II direct restorations. Liner under direct restorative materials. Restorations of small posterior cavities (including occlusal restorations).

Features

Can be placed in 4mm layers
Self-levelling action
High filler content
High level of radiopacity

Advantages

High depth of cure
Easy adaptation
Reduced polymerisation shrinkage
Shows on X-rays

Syringe 2gm

Available in	Code	Available in	Code
Universal	AH0920	Dentine	AH0921

Property	ISO4049:2019	Typical Properties
Flexural Strength	80MPa	115 MPa
Depth of Cure (mm)	1mm min	4mm
Radiopacity AI/mm	1.0mm	2.5mm
Compressive Strength	-	250MPa
Vickers Hardness	-	42
