

VICKERS HARDNESS

55

- ✓ Long lasting restorations
- ✓ Good aesthetics
- ✓ Radiopaque
- ✓ Good retention
- ✓ Penetrating depth of cure

Syringe 4gm

reliaFIL Bulk

An advanced composite predominantly designed for posterior use, including occlusal surfaces. It provides exceptional condensability and sculptability, delivering superb shade stability. Features low shrinkage for stress-free restorations and full polymerisation at 4mm curing depth. reliaFil Bulk is optically balanced thanks to its filler structure and therefore opaque enough to optimally harmonise with natural teeth. Suitable for use with both Halogen and LED curing lights.

Indications

Direct posterior restorations

Features

- High wear resistance
- Optimum translucency
- High level of radiopacity
- Low polymerisation shrinkage
- Can be placed in 4mm layers

Advantages

- Long lasting restorations
- Good aesthetics
- Shows on X-rays
- Good retention
- Penetrating depth of cure

Available in	Code
Universal shade	AH0860
Shade A	AH0861

Property	Typical Properties
Flexural Strength	110 MPa
Flexural Modulus	11GPa
Filler Content	87% (wt)
Radiopacity	2.9mm:Al
Compressive Strength	330MPa
Depth of Cure (mm)	4.2mm
Light Diffusion	0.8µm
Vickers Hardness	55
